

VIPER 640 EVENT AT LAKE GARDA 2015 **22-26th June 2015**

A new and exciting Viper 640 European Event in 2015 has been announced by Rondar Raceboats. Lake Garda is one of the great sailing venues and there are already signed up entries from the UK and Australia with potential entries from the USA.

It's a serious sailing regatta and Italian holiday in one event! This will be a joint fleet with the K6 Class, but with separate starts. Charter boats may be available from Rondar Raceboats.

Lake Garda is a deep finger lake with steep mountain sides. The wind blows strong in the afternoons, making it an ideal venue for the high performance Viper 640. Entry costs will be in the region of just Euro250.00 per boat, including a pasta meal after racing.

Email Rondar Boats UK to reserve an entry. admin@rondarboats.com

Garda Winds and Weather

Riva del Garda traditionally enjoys hot summer sunshine during the day and warm evenings. The "ORA" wind blowing from the South, is the most famous wind in northern Lake Garda, well known by sailors from all over the world. It alternates with the Pelèr, (morning northerly wind) blowing from around noon until sunset. The Ora achieves its maximum intensity in northern Lake Garda thanks to the Venturi effect which intensifies its wind force to over 20 mph, provoking significant wave motion. It has its maximum intensity during the summer months.

Fraglia Dela Vela Garda

The new Fraglia Dela Vela Garda clubhouse at Riva is one of the best and most welcoming in the world. Positioned alongside the lake and just a few steps from the old town centre, it has modern facilities, including slipway launching and crane lift into the protected harbour.

The professionally run Club regularly organises large international regatta fleets throughout the year.

More about Riva del Garda
